Booth FAQ

For staff. What visitors ask, and what to say.

profstopick

Free	Semester Pass	Year Pass	Graduation Pass
₱0	₱99	₱150	₱250

THE SITE

What is profstopick?	A site for enlistment. Prof reviews, grading statistics, live section schedules, a schedule builder, and an AI advisor.
Who made it?	Gelo, a software developer who works at a software technology company with one of our members.
Is it from Ateneo?	No. Students run it. It is not part of any school.
Which schools?	Ateneo, UPD, DLSU, and Mapúa.
What does a score mean?	It sums up how students feel about the prof. It is not a grade. Few comments: read the comments. No comments: no score.
How do I find my prof?	Search a surname or a course code, like MATH 30.23.

REVIEWS AND PRIVACY

Where do the reviews come from?	Mostly the Profs to Pick Facebook group, where students post about their profs. Students can also post reviews on the site.
Why not just use the Facebook group?	The group is slow. You scroll through so many posts and read so many comments just to get a feel for one prof. We collected all of it and built statistics for each prof, so you see right away if they give easy A's, if the workload is heavy, if they are strict, and more.
Are you just copying the Facebook posts?	No. We do not republish Facebook posts, and we do not build profiles on the students who wrote them. We turn the reviews into information about the prof: workload, grading fairness, and whether a 4.0 is attainable.
What about data privacy? Is it anonymous?	Yes. Every review is de-identified before it goes up. No one can see who wrote it, and nothing on the site links back to the person.
What do you remove?	Reviewer names and usernames, profile links, phone numbers and emails, student IDs and tags, any mention that could identify the reviewer, unrelated personal details, and outside links.
How is it cleaned?	Every review goes through automated cleaning, then a manual check, before it is published. Then it is scored on workload, grading fairness, and 4.0 attainability.
Is that legal? Do you sell data?	We follow the Data Privacy Act of 2012 (RA 10173). We keep only what we need to describe the prof and strip out personal information. We sell no data, to anyone.
I wrote a review, or one is about me.	Message ateneoprofstopick@gmail.com or @profs.to.pick. We take it down while we check.

More on the back.

Booth FAQ, continued

profstopick

FREE OR PAID

Is it free?	Yes. Reviews, ratings, and the basic schedule builder are free. Free gets 3 advisor asks a week.
What does a pass add?	Unlimited AI advisor asks. Ask who to take for a course. It answers from the reviews and the sections.
Which pass should I get?	“If you want to try it out, get the Semester Pass. But we recommend the Year Pass, or the Graduation Pass, which lasts your entire 4 years in Ateneo.”
Can I get my money back?	Yes. Full refund within 7 days. Message ateneoprofstopick@gmail.com or @profs.to.pick.

THE AI ADVISOR

Why is there AI?	It is one part of the site. Reviews, grading statistics, and the schedule builder work without it. The advisor only answers when you ask it.
Isn’t AI bad for the environment?	Our AI is hosted locally. It runs on our own PC at home, which we reach remotely, not in a data center. It uses no data center resources, only our own PC’s.
Where do my questions go?	To our own PC at home. Not to a big AI company’s servers.

PAYING AND THE CODE

How do I pay?	Cash, GCash, or Maya, here at the booth. Online payment is not on yet. For GCash or Maya, check that the payment came in before you write the code.
How do I use my code?	The code is written on the back of the pass card. Scan the QR or type profstopick.com, make an account, then go to profstopick.com/pass, type the code under “Have a code”, and tap Redeem.
The QR or code does not work.	“Give us your email, the one you use to sign up on profstopick, and we’ll add the pass to your account.”

HOW TO MAKE A SALE

1 **Talk to them.**
Show them why profstopick is good for them this enlistment.

2 **Bring them to the booth.**
Ask them to come with you to the booth. If you let them go, they will not come back to pay.

3 **Get them to pay.**
Cash, or they scan the GCash QR. Try to not let them go easily.

4 **Give them the voucher.**
Write the code on the back of the pass card for their pass. No code? Ask Prince.

After every sale, update the voucher code sheets tracker.
